### III. PROJECT DESCRIPTION AND DETAILS

Project Location (all addresses and tax parcels): 17 Hallwoods Rd, Ithaca, NY 14850, Tax # 52.-1-4.32

Property Size (acres): existing: 23 acres proposed: n/a

Building Size (square feet): existing: 220,000 proposed: n/a

Proposed Dates: start: 12-15-21 end: 6-30-22

Please provide a narrative of the Project and the purpose of the Project (new build, renovations, and/or equipment purchases, etc.). Identify specific uses occurring within the Project. Describe any and all tenants and end users:

As Knickerbocker has transitioned into its new Bed Architecture programs over the past 10 years, the existing facilities in New Jersey do not afford the proper space and manufacturing environment to continue to grow. The new product lines have more space intensive requirements due to the complexity in the process, and the size and scale of the equipment necessary.

One of the cornerstones of the transition to Ithaca/Dryden will be a state of the art powder coating system. It will be both energy efficient, and the most environmentally friendly process. In addition, all new injection molding equipment will be purchased in the planned move. A focus on all infrastructure upgrades will be energy efficiency as older heating, lighting, cooling systems will be replaced. The exterior grounds and drainage systems on site will be repaired, and the landscaping, parking lots, and driveways will be upgraded.

Knickerbocker's new products for the hospitality and hotel industries are scheduled to launch in the third quarter of 2022. These products require more manufacturing space than our traditional offerings, thus creating the need for substantially more manufacturing space. The project consists of the purchase and renovation of a 220,000 square foot building in Ithaca, NY, along with purchase of equipment. The new hospitality division will be started in the facility, followed by the phase out of manufacturing in New Jersey and consolidation of all current product lines in Ithaca. We currently have two factories. 30,000 and 64,000 Square feet. The \$10.6 million investment will repurpose a vacant industrial building into a state-of-the-art manufacturing facility that is best in industry class, and capable of attracting a loyal workforce that is dedicated to building industry leading products. The project will create 80 new jobs over three years. This project is a large undertaking for our company and there is a gap in financing that local and state assistance is critical to help fill.

Is there a likelihood that the Project would not be undertaken but for the financial assistance provided by the Agency?  Yes  No

If yes, describe the reasons why the Agency's financial assistance is necessary and the effect the Project will have on the Applicant's business or operations. Focus on competitiveness issues, project shortfalls, etc.:

Knickerbocker would like to invest a substantial amount of money to upgrade the infrastructure of the building we are purchasing. The focus will be on energy efficiency and sustainability on site with the HVAC and new equipment. The working environment will provide a comfortable factory floor with air conditioning as well as new heating systems. We will also install a state of the art powder coating system to reduce emissions and be the most environmentally friendly process available. Estimates on this system range from \$750,000 to \$1,000,000. Although a baked enamel system is far less costly, and

acceptable in an industrial plant, we are undertaking this additional cost because of the far superior environmental impact this will have.

Knickerbocker is committed to providing a wide range of well paying jobs far in excess of the “living wage” that is required in Tompkins County. We are making a long term commitment to the area, and investing a substantial amount in upgrades to the facility, and assistance will allow us to transition all of our operations to Ithaca/Dryden must faster, and will create more jobs.

If no, provide a narrative indicating why the Project should be undertaken by the Agency:

If the Applicant is unable to obtain financial assistance for the Project what will be the impact on the County/City/Town/Village?

Less factory jobs and less construction jobs

Describe what green building practices you plan to use:

Energy efficient HVAC

Powder Coating System that is more environmentally friendly than a traditional, less costly spray booth

New Energy efficient lighting

Offices diffused with natural lighting

Will this project result in a regular increase in overnight visitors to your facility (e.g. for training programs)?  Yes  No

If yes, number of visitors per year: 25

Average duration of stays (days): 1-3
